

TECHNICAL SHEET

POLYESTER CURTAINS H1800 MM

White

806090

PRODUCT DESCRIPTION

The 180 cm high water-repellent shower curtain is a functional product to protect your shower space from splashes.

Polyester is a durable and easy-to-care material that can be machine washed. Another advantage of this curtain is their leaded bottom, which means that it is equipped with a built-in lead strip along the bottom hem. This feature allows the curtain to stay in place and not move around with drafts.

The white plastic rings, included with the curtain, make it easy to install and move the curtain along the rod.
