

STRAIGHT BAR Ø 32 MM

Polished Gloss

000106

image-produit

PRODUCT DESCRIPTION

The 32 mm diameter polished stainless steel grab bar can be installed in a shower or bathtub area. It can be positioned vertically, horizontally or 135°.

It allows you to cross the step of a tray or the edge of a bathtub (in an upright position only), to keep your balance in a standing or sitting position, to get up and to transfer from one support to another.

304 stainless steel provides excellent corrosion resistance and durability even in the wettest conditions.

The bases and fixing covers are made of polished stainless steel.
