

MENTON WASHBASIN

White

052690

PRODUCT DESCRIPTION

The curved MENTON washbasin is a piece of equipment adapted for people with reduced mobility (PRM) ideal for shared spaces, combining design and functionality. It is made of composite material, a mixture of marble powder and synthetic resin (meeting the NF EN 14688 standard). Its smooth, non-porous Gel-Coat coating ensures ease of cleaning and resistance to scratches and temperatures up to 95°. The vanity top, while compact, offers a small, convenient space to store your toiletries or other essentials. It is equipped with a front skirt. Available in two versions: right or left version to adapt to all configurations. This washbasin is self-supporting: pre-drilled for direct wall fixing. It is available with or without overflow and can be delivered with a hole in the shaft or long side for the taps or without a hole, depending on your preferences (to be defined when ordering). This product is sold without taps or drains, giving you the freedom to choose the accessories that suit your needs and style.
